

Managing Environmental Sustainability for Competitiveness

Do you make sustainability work for your business?

This series of workshops in rural and regional south east, central coast and central west Queensland is designed to give you practical strategies, tools and methodologies to profit from environmental sustainability in terms of your finances, staff and your community.

Main objective of workshop:

To help you Improve your business performance through managing environmental sustainability change.

Do you want to:

- discover how to increase you profits while being kind to the environment?
- receive expert tips on how to save energy while saving money?
- enhance your business profile, reputation and branding?
- get support for your business sustainability initiatives?
- take action now and be ready for legislation?
- watch successful SMEs tell their story and explain what works for them?
- obtain hands-on experience through discovering what actions work best for you?
- create a rewarding experience for your staff while achieving business objectives?
- get hold of the tools to make environmental sustainability work for you?
- create change strategies that make you a forward-thinking business?

Cost: The workshops are free to Chamber of Commerce Members. The workshops are sponsored by USQ and the Queensland government. Market value for these workshops is \$500/head.

Target audience: Manufacturing, defence, clean energy, mining technology and creative industries although the workshop is also suitable for other industries.

More about your workshop presenters:

Retha, Doren and Peter have recently developed a best practice framework for managing environmental sustainability change based upon the experiences of Queensland SME sustainability champions. This practical workshop is based upon their work in the SME sector. Selected environmental sustainability champions will also tell their stories and explain what lessons they have learnt on their journey to sustainability.
